

Title of your Homework 1

Name Surname¹, Name Surname¹ and Name Surname¹

¹University of Padua, Italy

Abstract

A clear and well-documented \LaTeX document is presented as an article formatted for publication by CEUR-WS in a conference proceedings. Based on the “ceurart” document class, this article presents and explains many of the common variations, as well as many of the formatting elements an author may use in the preparation of the documentation of their work.

Keywords

keyword 1, keyword 2, keyword 3

1. Introduction

Introduce the context, motivations, and goals of your project.

The paper is organized as follows: Section 2 describes our approach; Section 3 explains our experimental setup; Section 4 discusses our main findings; finally, Section 5 draws some conclusions and outlooks for future work.

2. Methodology

Describe the methodology you have adopted, the architecture of your system, your workflow, etc.

3. Experimental Setup

Describe the experimental setup, i.e.

- used collections
- evaluation measures
- url to git repository and its organization
- hardware used for experiments
- ...

“Search Engines”, course at the master degree in “Computer Engineering”, Department of Information Engineering, and at the master degree in “Data Science”, Department of Mathematics “Tullio Levi-Civita”, University of Padua, Italy. Academic Year 2021/2022

CEUR Workshop Proceedings (CEUR-WS.org)

Table 1
Frequency of Special Characters

Non-English or Math	Frequency	Comments
Ø	1 in 1,000	For Swedish names
π	1 in 5	Common in math
\$	4 in 5	Used in business
Ψ_1^2	1 in 40,000	Unexplained usage

4. Results and Discussion

Provide a summary of the performance on the previous year dataset.

Discuss the results and any relevant issues.

5. Conclusions and Future Work

Provide a summary of what are the main achievements and findings.

Discuss future work, e.g. what you may try next and/or how your approach could be further developed.

6. Misc [TO BE REMOVED]

6.1. Tex Files

Put your \LaTeX files into the `section` folder as shown in the examples above.

6.2. Figures

Put your figures into the `figure` folder and put the caption under the figure. Example of reference to Figure 1.

6.3. Tables

Put the caption above the table. Example of reference to Table 1.

See the `booktab` packaged documentation for further options.

6.4. Bibliography

Example of citations:

- name: Salton [1]
- parenthesis: [1]

An initial list of references is provided in the files `bibliography.bib` and `proceedings.bib` that you can expand.

See the `natbib` packaged documentation for further options.

Figure 1: 1907 Franklin Model D roadster. Photograph by Harris & Ewing, Inc. [Public domain], via Wikimedia Commons. (<https://goo.gl/VLCRBB>).

6.5. Acronyms

Use the

`\ac{acronym}`

command to insert acronyms, eg. *Average Precision (AP)*. The command will expand the acronym the first time it is used.

An initial list of acronyms is provided in the file `acronyms.tex` that you can expand.

See the acronym packaged documentation for further options.
